

MOST™ Dial Code and Rate Manager

Overview

MOST Dial Code and Rate Manager is a standalone software product that is proven to improve Wholesale carrier profitability and competitive advantage.

MOST Dial Code and Rate Manager empowers negotiation of the best rates available for international voice minute termination and protects against lost revenue and margin through incorrect or inappropriate selection of rates.

MOST Dial Code and Rate Manager is part of a larger modular software suite that covers the entire Wholesale process from Buy rates, Routing decisions, Switch Management and Sell rates.

Wholesale Carrier Business Problems

In most Carrier businesses the main issue is the escalating 'Data Mountain' of Rate and Code information coming from supplying carriers on a daily and even hourly basis. It is impossible for a manual process to capture, analyze the data, identify the changes, risks and any potential opportunities available. This results in:

- Destination 'Cherry Picking'
- Invoice disputes
- Incorrect data used in downstream routing and billing systems
- Inefficient and Ineffective Rate Negotiation
- Haphazard Destination Management

Dial Code and Rate Manager Delivers

MOST Dial Code and Rate Manager provides a carrier with easy-to-interpret 'Decision Support' information with the following business benefits.

True 'Code-to-Code' Analysis

Code Risk Analysis provides a deeper analysis giving easy comparison between carriers and removing the risk of incorrect mapping of rates to destinations. Instant data view ensures that all data immediately reflects any changes made.

Next Generation Dynamic Mapping

Superior solution to a static mapping, reflecting real-world business dynamics

'One Touch' Rate sheet upload process

Auto-processing of multiple rate sheets in multiple formats provides consistent data management and presentation which saves significant manpower. Increased efficiency from existing resources speeds up procurement of voice traffic. Significant risk reduction in Data Entry and Handling as data is auto-processed, changes analyzed and clearly presented improving downstream system effectiveness

Significant Reduction in Invoice disputes

Rate Sheet Repudiation provides accurate information cross referencing quoted rates against invoiced traffic.

Accurate Destination Management

Breakout Analysis of granular routing opportunities to improve margin and grow traffic

MOST Dial Code and Rate Management Deployment

Low Operational impact

Can be used without the involvement of your IT department as there is no Network level integration required and no additional software dependencies

Multiple Delivery Options

MOST Dial Code and Rate Manager can be uniquely delivered in a number of options

- **Installed** with small footprint and low operational impact
- **Hosted** in a secure managed 24*7 operation with zero operational impact
- **Managed Service** including all Data Management.

Modular Approach

Can seamlessly add other parts of a larger modular software suite that covers the entire Wholesale process.

Industry Proven

Prime Carrier's products are industry proven, with a number of large scale Tier 1 deployments on a global basis delivering cost savings of around 5%, Margin improvement in the range of 2% to 5% and ROI within four to six months.

Product Features

Reference Data Management

Maintenance of master data:

- Master Code and Destination lists
- Partner reference data and commercial details
- Currency and Exchange rates
- Charge and switch time periods
- Service levels
- Business Rule storage to ensure accurate routing other necessary master information.

Rate Management:

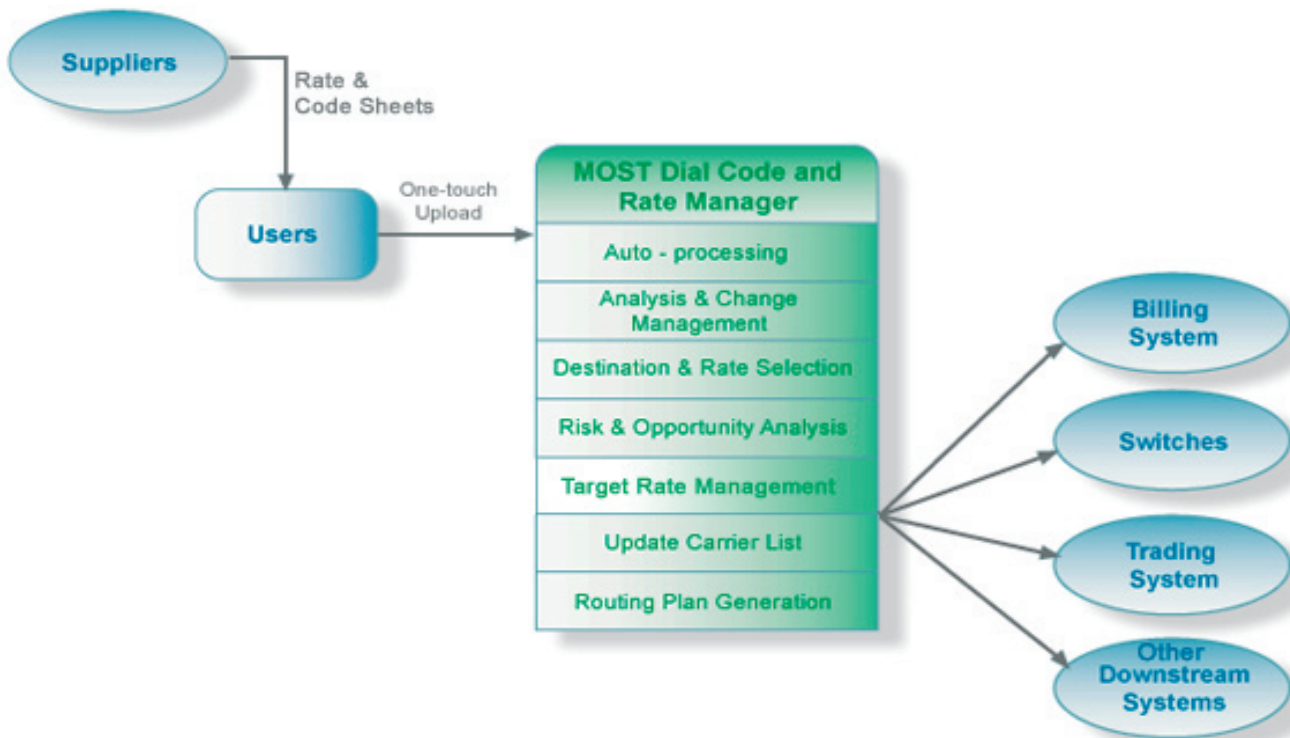

- Import, Numbering Plan, Calendar/Time Zone

Advanced Rate & Dial Code Management:

- Automatic import of carrier rate and code spreadsheets in their formats
- Automatic comparison processes to ensure accurate use of rates based on true dial code mapping and not description mapping
- Alarms and alerts for changed data and opportunity risk reports

Simple LCR Routing

- Identification of up to 8 routing options
