

nSettlement™

AM-BEO nSettlement Overview

The **AM-BEO nSettlement** product enables service providers to settle with 3rd party partners with whom they provide revenue generating services.

nSettlement supports a wide range of partnering agreements for content provision and network services and drives efficiency in complex partner value chains.

nSettlement creates a central point for partner management optimizing the internal business support processes leading to the easier introduction of new services and creation of new revenue streams.

nSettlement is part of the suite of established Rating, Charging and Settlement products offered by Prime Carrier, which offers a wide range of industry proven software solutions for both the wholesale and retail telecommunications markets.

Prime Carrier's products enable our customers to increase revenues, improve margins, effectively manage trading agreements, shorten settlement cycles and carry out revenue assurance.

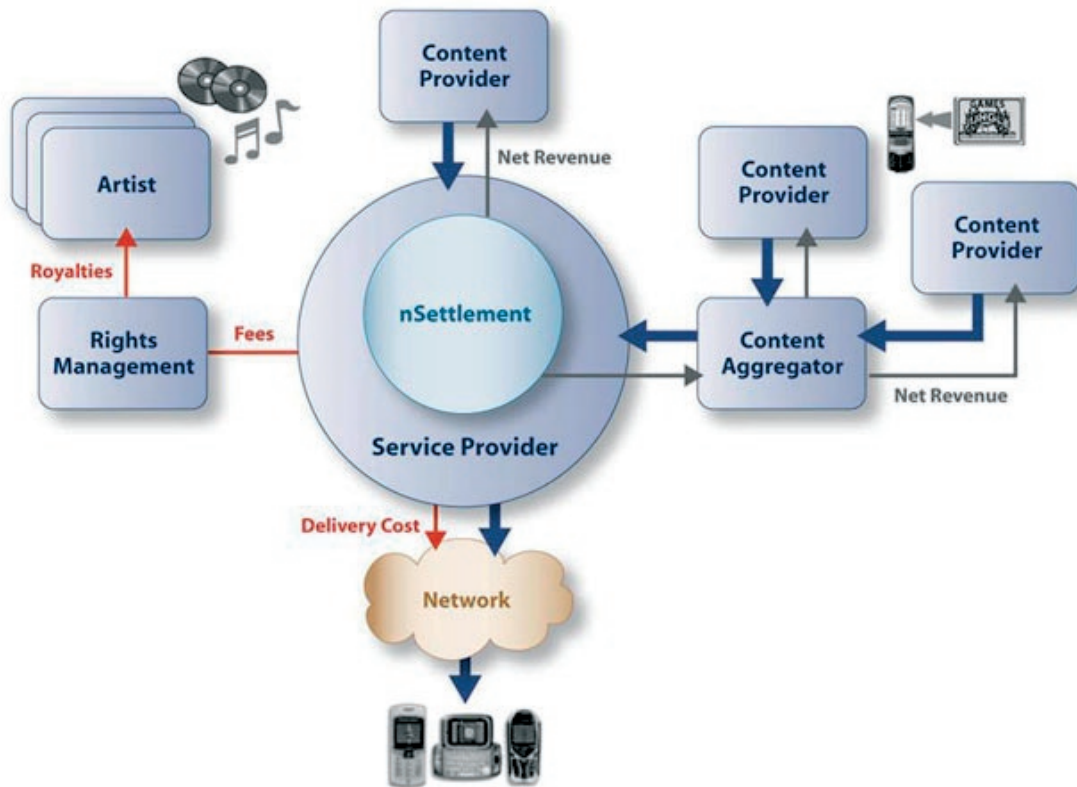

Complex Value Chains

With advances in network technology, service providers can introduce new products with 3rd parties to create additional revenue streams. This requires the management of a value-chain where the provider has to calculate and apportion the revenue generated, and any associated costs, to each of the partners in the chain.

The growth of global communications has increased the level and complexity of settlement models between operators, service providers, content aggregators and owners for services provided, as they evolve to embrace new services while ensuring accurate and timely settlement at the lowest operational cost.

nSettlement Delivers

- **Multiple partner agreement management** involving any content type for revenue and costs
- **Improved margin management and reduced revenue leakage** through accurate automated calculation of revenue share, event analysis and reporting
- **Maximized value chain performance** through accurate and timely settlement information
- **Lower operational costs** through centralization of partner management
- **Improved speed of partner integration** and delivery of new services
- Detailed information for **improved settlement negotiations**, cash flow management and marketing programs
- Support for **Advertising and Royalty models** within Partner agreements
- Ability to apply **one time setup and recurring fees**

Enterprise Ready

The **AM-BEO nSettlement** product has been developed for the Communications industry where high performance processing of transactions across value chains involving multiple partner agreements is crucial. Tier 1 operators are using the AM-BEO technology, chosen for its ability for proven scalability and reliability and ability to perform high-volume revenue transaction processing with reduced TCO.

nSettlement Features
